Art Unit: 1753

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims **1-12**, drawn to a method for fabricating a photocatalytic fluorescent lamp device capable of cleaning air, classified in class 427, subclass 67.
- II. Claims 13 and 14, drawn to a process for treating waste gases, using the photocatalytic fluorescent lamp capable of cleaning air according to method of claim 1, classified in class 204, subclass 157.3.
- III. Claims 15 and 16, drawn to a process for treating waste gases, using the photocatalytic fluorescent lamp capable of cleaning air according to method of claim 1, classified in class 204, subclass 157.3.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions have different designs, modes of operation, and effects.

Group I is directed to a method of making a photocatalytic fluorescent lamp device.

Group II is directed to a method of using a photocatalytic fluorescent lamp device wherein a natural convection of waste gases is caused.

Group IIII is directed to a method of using a photocatalytic fluorescent lamp device wherein a forced convection of waste gases is caused.

Application/Control Number: 10/757,463

Art Unit: 1753

The methods recited above contain steps that are methodically different from each other and are not required for each of the Groups. It would be a burden on the Examiner to search for the specific method steps for each of the Groups when they are not even required for each Group.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the

Application/Control Number: 10/757,463

Art Unit: 1753

election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edna Wong whose telephone number is (571) 272-1349. The examiner can normally be reached on Mon-Fri 7:30 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam Nguyen can be reached on (571) 272-1342. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a
